Response to Amendment

1. The amendment filed on March 21, 2005 have been entered as requested.

Allowable Subject Matter

2. Claims 1-5, 7-18 and 20 are allowed.
3. The following is an examiner's statement for reasons for allowance:

Claims 1 and 15 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a **space time encoder that provides, at successive time periods, permutations of the coded symbols of a code vector to separate locations for communication therefrom in a manner such that, at completion of successive time periods, each coded symbol of a code vector is sent from the separate locations.**

It is noted that the closest prior art of record, Ling et al. (US 6771706) discloses an encoder for performing coding, an interleaver and two transmission antennas for transmitting the coded data. However, Ling fails to disclose or render obvious the above underlined limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- (a) Hammons, Jr. et al. (US 6678263) discloses space time encoding
- (b) Seshadri (US 5479448) discloses a method and apparatus for providing antenna diversity.
